### **DETAILED ACTION**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wu (US 6,493,005) teaches a method and apparatus for sorting and displaying multiple On-Screen Displays (OSDs) with special features such as fade in/out.

Xue (US 6,587,155) teaches a fade circuit.

Ozcelik (US 2002/0149626) teaches display hardware that controls many potentially overlapping OSDs.

The following is an examiner's statement of reasons for allowance.

None of the cited references teach, as cited in claims 1, 11 and 13, an apparatus including a fade controller for providing programmable fade rates for an OSD window within a video display, comprising:

accumulation circuitry (means) that responds to reception of a plurality of accumulation control signals and respective programmable vertical and horizontal fade interval data signals corresponding to respective programmable vertical and horizontal OSD fade intervals by providing respective pluralities of cumulative vertical and horizontal fade interval data signals corresponding to respective pluralities of cumulative vertical and horizontal OSD fade intervals;

counting circuitry (means), coupled to said accumulation circuitry, that responds to reception of a plurality of timing control signals and said pluralities of cumulative vertical and horizontal fade interval data signals by providing vertical and horizontal

count signals corresponding to respective completions of said cumulative vertical and horizontal OSD fade intervals; and

encoding circuitry (means), coupled to said counting circuitry, that responds to reception of a plurality of OSD window control signals and said vertical and horizontal count signals by providing an OSD fade control signal corresponding to occurrence of said OSD window within said video display.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pervan whose telephone number is (571) 272-0910. The examiner can normally be reached on Monday - Friday between 8am - 5pm.
